SKILLS

- **Programming Languages:** Elixir, JavaScript, TypeScript, Python, Java, Rust.
- **Front-end:** Phoenix LiveView, React.js, Next.js, TailwindCSS, Styled-Components, ContextAPI, VueJs, ThreeJs, HTML, CSS .
- **Back-end:** Phoenix, Node.js, Express.js, Nest.js, REST APIs, Prisma, Quarkus, Ecto.
- **Databases:** PostgreSQL, Redis, ClickHouse, MongoDB, SQL.
- **Other:** Docker, AWS EC2, AWS Lambda, Jest, SuperTest, Git, GitHub, Vercel.
- **Soft Skills:** Agile methodologies (Scrum), Clean Code, Problem Solving, Teamwork.
- **Languages - English (Advanced), Portuguese (Native)**

EXPERIENCE

Trio Payments - Software Engineer - (September 2023 - Present)

- Developed and maintained microservices for Pix transactions, integrating with BACEN (Brazil's central bank) using Elixir, Phoenix, and LiveView.
- Built the company's landing page using Contentful CMS + Next.js, enabling the marketing team to create and manage content independently.
- Designed and implemented a custom embedded whitelabel SDK for clients to offer Pix/open-finance cash-in and cash-out
- Created an AWS Lambda service in Rust for instant transaction receipt generation, optimizing real-time user experience.
- Collaborated on the migration of the external API from a partner banking service to an in-house microservices-based architecture.
- Collaborated on building an Internet Banking web page connected to in-house banking services.
- Developed a prepaid virtual credit card system, integrating with third-party providers for issuance and transaction processing alongside real-time user interfaces.
- Joined as a Junior Developer and promoted to Mid-Level within 6 months due to overall contributions to the product. Currently advancing toward a Senior role.

OZmap - Full Stack Developer (Freelance) - (June 2023 - September 2023)

- Updated and developed new features in an existing Vue.js + TypeScript microservice.
- Built and optimized backend services using Node.js and Express.js.
- Integrated geolocation and mapping tools into UI components.

Prima FIAT - Full Stack Developer (Freelance) - (May 2023 - June 2023)

- Developed a frontend interface to display car deliveries and a separate portal for data input.
- Implemented a backend service to persist delivery data into a database.

Driven.t - Full Stack Developer (Educational) - (December 2022 - March 2023)

- Served as Scrum Master, ensuring agile methodology best practices.
- Built a customizable event management platform using React.js (Frontend) & Node.js (Backend).
- Implemented database solutions with PostgreSQL, Prisma ORM and Redis.

EDUCATION

Full Stack Development - Driven Education - (June 2022 - May 2023)

- Intensive training in frontend, backend, databases, and agile methodologies.
- Focused on performance optimization, clean architecture, and best practices.

Computer Science - CS50 - Harvard University - (December 2022 - July 2023)

- Covered computer science fundamentals, algorithms, and web development.
- Worked with C, Python, SQL, JavaScript, HTML, and CSS.

Civil Engineering (Incomplete) - Federal University of Santa Catarina (UFSC) - (March 2014 - March 2022)

- Studied computer science fundamentals, numerical calculus, and algorithms
